

IMPROVING **EFFICIENCY** THROUGH STREAMLINED LOGISTICS

# Red Customs Broker

# Supply Chain Management

Coordinate every step for **smooth** operations

Effective supply chain management is essential to logistics. Red Customs Broker coordinates between suppliers, manufacturers, and distribution channels, optimizing the flow of goods from raw materials to finished products, reducing lead times and improving efficiency.

# Smart transport solutions

Our transportation network includes road, rail, air, and ocean freight. We tailor our transportation solutions to your specific needs, ensuring your goods arrive at their destination safely, on time, and at the lowest cost. Route optimization and advanced tracking systems are essential to the reliability of our service.

Deliver goods  
**efficiently** by all  
modes.

# Execution of Bookings

From order receipt to processing, packaging, and shipping, RED ensures every step of the fulfillment process is efficient and customer-focused. Our fast and accurate fulfillment system reduces lead times, improves customer satisfaction, and optimizes business efficiency.

**Simplified** order  
processing and  
delivery

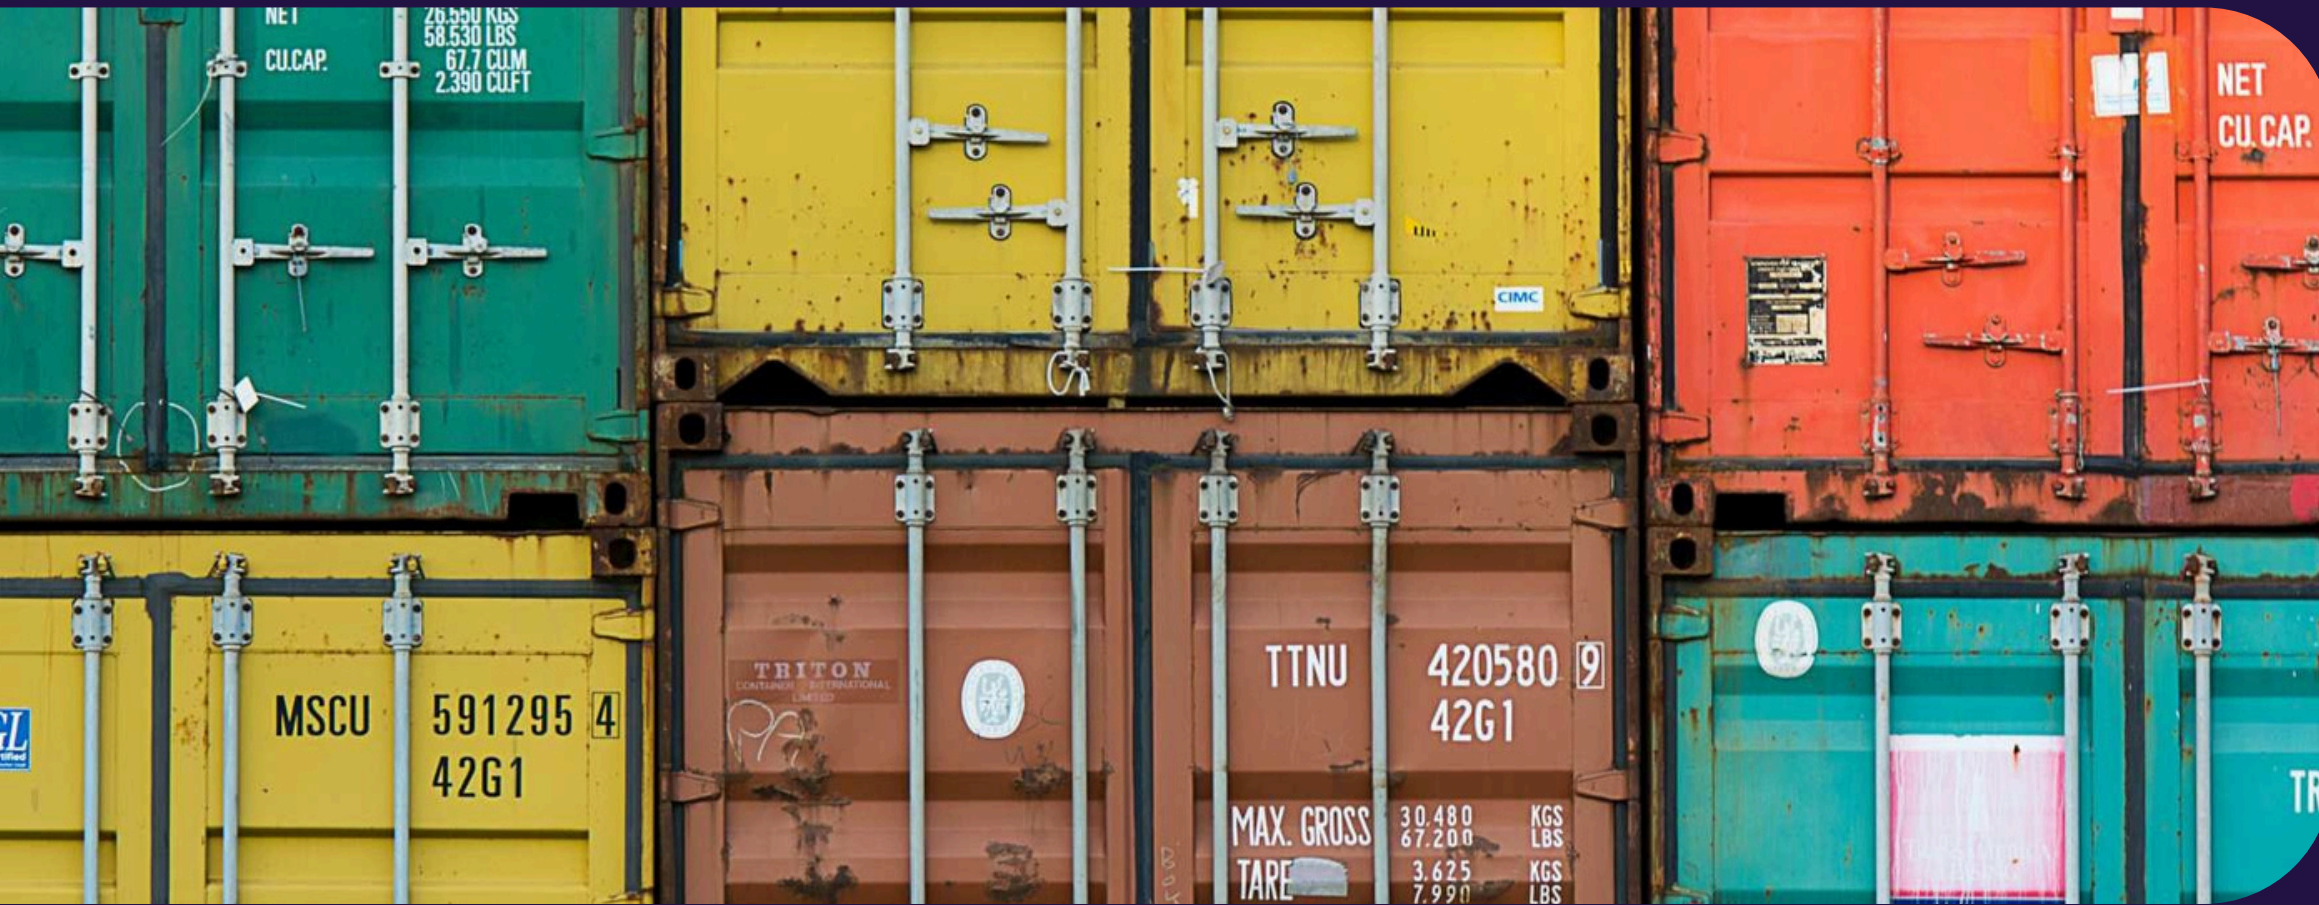

# Last-Mile Delivery

Carry out the final step with **precision**

Last-mile delivery is a critical component of the logistics process. At RED, we ensure that goods are efficiently delivered to their final destination, whether that's a business or a personal customer. We prioritize fast and accurate delivery to enhance the customer experience and meet the demands of the modern marketplace.

# Leveraging **expertise** for smarter logistics.

RED integrates logistics feedback, from customized tracking systems to network responsiveness and predictive analytics. This allows us to optimize routes, efficiently manage inventory, and provide real-time updates, thus improving speed and reliability.
